

**Notice of Public Review for CSA B56:25 (1st Edition)
Power Engineering – Facility Rating and Staffing**

August 21, 2024

Dear interested parties,

The CSA B56 Technical Committee is developing a new standard for Power Engineering to promote uniform, coordinated, and consistent administration and enforcement related to the classification, rating, and supervision requirements for the safe management and operation of boilers and refrigeration facilities.

We would like to announce that the public review for the proposed new standard CSA B56:2025 is live, and we welcome your review and comments.

The public review period is 60 days and will close on October 20, 2024.

Please feel free to share this communication with other interested parties to allow for their review of the draft standard and submission of their comments through the public review process.
